

STATE OF MINNESOTA
COUNTY OF CARVER

DISTRICT COURT
FIRST JUDICIAL DISTRICT
PROBATE DIVISION
Case Type: Special Administration

In the Matter of:

Court File No. 10-PR-16-46

Estate of Prince Rogers Nelson,

AFFIDAVIT OF [REDACTED]

Decedent.

[REDACTED]

[REDACTED], being first duly sworn upon oath, deposes and says as follows:

1. I am over the age of 18 years and competent to testify regarding the facts and matters stated herein, which are based on my personal knowledge.

2. I am a Client Services Manager for MarkMonitor Inc. ("MarkMonitor"). As further described below, MarkMonitor was hired by Comerica Bank & Trust, N.A. (the "Personal Representative") in April 2017 to provide monitoring and enforcement services related to the intellectual property assets of the Estate of Prince Rogers Nelson (the "Estate").

3. I have been employed by MarkMonitor since October 2012. My job involves managing the full lifecycle of client engagement from integration, ensuring delivery of service requirements, and implementing recommendations. As part of that role, I have knowledge of MarkMonitor's brand protection and anti-piracy services.

4. MarkMonitor offers various services related to establishing and protecting brands. MarkMonitor uses industry-leading technology and expertise to discover and take action against infringement occurring in a wide variety of digital channels, including websites, paid searches, social media, mobile apps, e-commerce marketplaces, and the major file sharing networks. In the world's ten largest e-commerce markets, for example, MarkMonitor's enforcement efforts

for customers achieve an average compliance rate of over 90%. Over half of Fortune 100 companies use MarkMonitor to protect their brand.

5. MarkMonitor is providing two main types of services to the Estate—brand protection and anti-piracy.

6. MarkMonitor's brand protection services for the Estate focus on detecting and taking action against online sales of unauthorized or otherwise infringing merchandise and other physical products. Attached as Exhibit A is a report prepared by MarkMonitor regarding the brand protection services it has provided to the Estate through the end of October 2017.

7. MarkMonitor's anti-piracy services for the Estate focus on detecting and taking action against unauthorized use of certain audio or video content. Attached as Exhibit B is a report prepared by MarkMonitor regarding the anti-piracy services it has provided to the Estate through the end of October 2017.

8. Both brand protection and anti-piracy are a continuous, ongoing process. For example, if enforcement is successful against one infringer, it is common for a different infringer to emerge to fill the marketplace void left after the successful enforcement action. As a result, monitoring and enforcement efforts can reduce and stabilize the amount of infringement, but it is virtually impossible to achieve zero infringement at any one time, particularly with intellectual property that has the scope and fame of that of the Estate.

[Remainder of page intentionally left blank. Signature page follows.]

Further affiant sayeth not.

Dated: 11/10/17

Subscribed and sworn to before
me this 02 day of November, 2017.

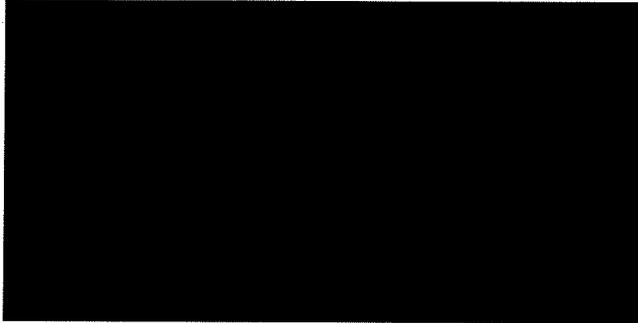

EXHIBIT A

Brand Protection Program Brief

Comerica Bank & Trust N.A. has significantly reduced the availability and sale of unauthorized, or otherwise infringing merchandise and digital content on marketplaces, websites, and social media channels through aggressive enforcement online.

In addition to the removal of thousands of items from the online market, these efforts have lasting impact through changing seller behaviour, building strong relationships with marketplaces globally, and constantly creating awareness about online brand protection efforts to deter would-be infringers.

Detection & Review – 37,161 marketplace listings, 4,989 URLs, and 4,271 social media links have been reviewed and cased since program inception April 7, 2017.

Enforcement – 8,660 marketplace listings have been removed to-date across multiple platforms (eBay, Amazon, Etsy, iOffer, etc.), and 584 infringing website links shut down across 158 websites in response to our takedown demands. Compliance is high at 96.8%. Strategic social media enforcements are designed to send clear warnings to target audiences.

Impact & ROI – An Estimated 37% of all Prince t-shirt ASINs (individual items) have been removed from Amazon US, based on benchmarks taken prior to enforcement. T-shirt sales on US marketplaces were identified as a high priority during a pre-enforcement assessment of the landscape.

\$1,677,275 - Conservative estimated total value of goods removed (assumes available quantity of 1 item for every 1 listing. Most Amazon listings advertise available quantity of 30).

We have enforced on 1,076 unique sellers since program inception, and have measurably changed seller behaviour by reducing the number of repeat infringers by 30%.

Strategy: Brand protection efforts on behalf of the Estate continue to be driven by the following questions:

What are our priorities? Revenue recapture & loss impact areas, legacy and brand reputation, risk management, and consumer confusion. **How do we make an impact?** Focus resources where risk is greatest, continue to build momentum on marketplaces and monitor multiple distribution channels to maximize ROI for the Estate.

Keyword Definitions

- **Host Site URLs:** The webpage URL of a Host Site where content is stored. The number of unique Host Site URLs is a proxy of number of upload transactions
- **Host Site URLs Offline:** Number of Host Site URLs where the content is no longer available for download
- **Host Site URLs Compliance Rate:** Percentage of Host Site URLs discovered to be unavailable for download or viewing
- **Peer to Peer (P2P):** P2P technology is used by internet users find and trade digital files with one another. By using a P2P program, a user scans the hard drives of millions of people and is able to download content from others
- **Peer to Peer Notice Sending:** DMCA Notices are sent to the ISP of the person sharing a torrent file. The ISP then contacts their client requesting immediately removal of pirated content
- **Propagated Links:** Number of connection points from a content indexing webpage to a content hosting webpage that allow users to download content
- **Propagated Links Offline:** Number of web infringement records found to be unavailable
- **Propagated Links Compliance Rate:** Percentage of web infringements discovered to be unavailable for download or viewing
- **SELR:** Search Engine Link Removal
- **Unique (Propagated or Host) Files:** A unique file is a count of the complete content regardless of how many parts a file might be split into. EXAMPLE: Multiple parts to a movie (Part 1, Part 2) would be one (1) Unique File.

I WOULD DIE 4 U	85	684
U GOT THE LOOK	82	230

Top Host Sites (April 21 – Oct. 30)

A "Host Site" is where digital content is stored and then shared across a wide variety of linking sites. We enforce on the Host URL, which when removed has a domino effect on any associated links, causing them to go offline as well. The number of host URLs can be used as a proxy for supply; e.g. how much content is available.

Total No. UNIQUE Host Site URLs collected: 9,649

Host Site URLs Removed: 7,525

Top Link Sites (April 21 – Oct. 30)

Link sites are where internet users typically go to access digital content. The number of propagated links may not represent number of downloads or views, however they can be a good indicator of demand. The number of propagated links reflects how many times a specific Host URL was shared across web sites, blogs, forums etc.

Total No. Propagated Links: 37,941

Propagated Links Removed: 32,705

Search Engine Link Removal

Search engine links drive the majority of traffic to pirate sites and are the starting place for most mainstream customers seeking illegal content. Under section 512 (d) of the U.S. Digital Millennium Copyright Act, U.S. search engines are required to remove search links to copyright infringements from their search results.

Delisting is conducted using both host and link URLs, but is primarily designed to remove linking pages from search engines. In addition to removing pages, Google "down-ranks" domains that receive frequent complaints. All Google search delisting requests are documented online.

Details - URLs Sent and Compliance

Search Engine	Search Results Enforced	Search Results Complied	Search Results Rejected
Bing	1,454	1,438	1
Google	7,458	6,939	189
Grand Total	8,912	8,377	190

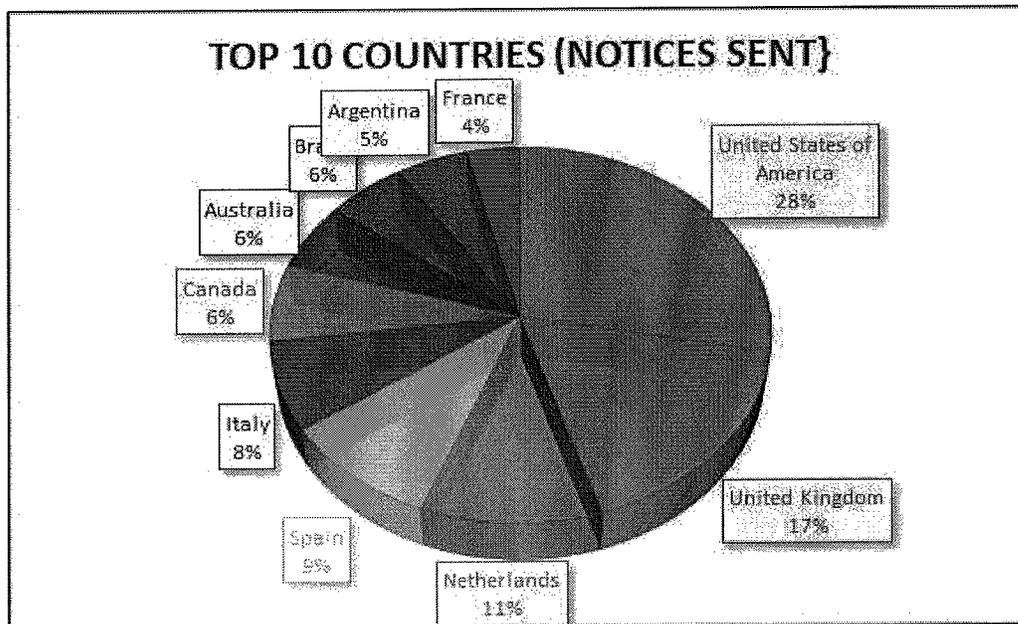

Peer to Peer (P2P) Notice Sending (April 21 – Oct. 30)

Peer to Peer (or P2P) technology enables millions of computer users around the world to find and trade digital files. In a P2P network, the "peers" are computer systems connected to each other via the Internet. By using a P2P program, a user can scan the hard drives of millions of people and instantly begin to download and save pirated content to their computer.

Since the beginning of the project 214,714 notices were sent to ISPs for illegitimate copies of Prince music.

P2P users typically share torrents that contain entire albums or discographies, as reflected by the top titles for P2P infringements below.

Top Countries by # of Notices sent

Details

Country	Notices Sent	Percent
United States of America	44,507	20.79 %
